

Andson Clério

SCULPTOR

Camanducaia - Minas Gerais, Brazil

BIOGRAPHY

Andson Clério is a Brazilian sculptor.

He began making sculptures intuitively and, over time, developed a deeper interest in organic forms, structures, growth and patterns observed in nature.

Working with steel wire, copper and brass, he shapes the material with his hands and pliers, without welding or joints.

Fractal structures are of particular interest, especially the way complex shapes can expand across different scales and patterns.

ARTISTIC PRACTICE

Since 2012

Research focused on the structural principles of living systems, including growth, branching, repetition, interconnectedness and transformation. Current materials include brass, copper and steel wire.

SELECTED SERIES

Roots of Life	Limited series of 18 sculptures
Tree of Life	Unique work
Salix	Unique work
Duality	Unique work
Yggdrasil	Unique work

PRESS AND PUBLICATIONS

2026 - Andson Clerio Remembers the Shape of Trees, Ateliera
